

GETTING STARTED WITH TEACHING ONLINE

Before you get started!

[Click for a MS Teams basics tutorial](#)

You will be hosting your classes and are able to share files with your students on the Microsoft Teams platform!

[Click here for resources](#) to support you in getting to know this platform.

START HERE!

Review student and instructor expectations. Review your course objectives and determine how you will structure your classes online to meet them.

Upload any files students may need such as the course outline to your MS Teams course or learning management system if you plan on using one!

Include active learning activities throughout to keep students engaged (e.g., group work, quizzes, breakout rooms, discussions, forums). More information below on how to implement these!
